

microSUMMIT Inc.

At microSUMMIT we provide enterprise-tailored services in the areas of LAN, WAN and Network Security for Cisco and Microsoft infrastructures, along with full-scale Wireless network deployments.

We specialize and provide extensive knowledge in Cisco, Cisco Meraki, Fortinet and Microsoft for medium to enterprise-level solutions. We are a complete solution provider and single point of contact for a wide range of solutions, including data cable plant deployments, IP telephony and cloud computing strategies all focused to meet the demands of client businesses while supporting their SLA and commercial needs.

Our mission is to facilitate high-level, professional and reliable solutions and services for our clients to ensure a seamless, cost-effective data infrastructure, allowing you to focus on your growing business needs.

Cisco Professional Services

We specialize in Cisco and Cisco Meraki, building Campus Routing and Switching Networks to maximize the performance of new and existing network infrastructure.

Our team of certified professionals are skilled in providing scalable Campus and Fabric Switching Solutions and comprehensive Secure Data Routing and Secure Perimeter Strategies to meet corporate and industry governance and compliancy standards and the demands of your growing business needs.

Microsoft Professional Services

Our certified team provides efficient and effective deployment of your Microsoft technologies and works with your organization to deploy and adopt Microsoft technologies efficiently and cost-effectively.

Our expertise helps you leverage the benefits of Office 365 to access the latest Office applications and cloud-based IT services, including business email, for a scalable, affordable model that includes best-in-class performance, accessibility, storage, security and compliance.

Integrated Services

Cabling - We provide industry-leading structured cabling solutions, including retrofitting and new deployments, with full adherence to industry standards, using proper cable management methods for clean traceable deployments.

VoIP - Our premises-based phone solution is a cost-effective alternative to traditional phone systems providing increased functionality, and flexibility at a lower cost.

Managed Services

Our comprehensive Managed Services program provides 24/7/365 monitoring, support and maintenance services to organizations whose business requirements demand the utmost in network reliability and stability. We provide complete network monitoring, metric reporting and patch management from your perimeter, into the comprehensive layers of your data infrastructure right down to the desktop, all for one fixed monthly fee.

Tech-Exec-as-a-Service

Tech-Exec-as-a-Service provides organizations of any size with the means of facilitating the on-demand role of an experienced IT executive or support role to the IT Director or CXO, to deliver strategic IT leadership, planning and management to help drive your business cost effectively while giving your organization a competitive advantage.

Hardware Reseller

We are a Cisco Select Partner and authorized dealer for the Cisco and Meraki family of products. We work aggressively to facilitate the best available value for all our product lines for your business; in network and server gear, storage, VoIP and IP Camera hardware, helping you address your infrastructure and data needs effectively, efficiently and within budget.
