Professional Services

Cisco Certified

Our team of certified Cisco professionals are skilled in providing scalable Campus Routing and Switching along with Fabric Switching Solutions and comprehensive Secure Data Routing. We provide Secure Perimeter Strategies to meet corporate and industry governance and compliance standards and the demands of your growing business needs.

Managed Services

Tech-Exec-as-a-Service

An on-demand placement role to provide experienced IT executive resources to the IT Director or CXO, delivering strategic IT leadership, planning and management to help drive your business cost effectively and gain a competitive advantage.

Integrated Services

Structured Cabling

Providing industry leading structured cabling solutions, including retrofitting and new deployments, with full adherence to industry standards using proper cable management methods for clean traceable deployments.

Video Surveillance

Providing high-resolution surveillance systems for commercial, industrial and retail facilities, ensuring CLA retail governmental compliance and physical security measures systems for specialty retail store deployments.

Voice over IP

Our VoIP solution delivers everything you need in a business communications solution while providing the highest-quality calling experience. Providing flexible, multi-featured options and unlimited long distance in Canada and the United States.

Hardware Sales

Cisco, HP & Aruba, Hikvision, Grandstream, Polycom and more.

We work aggressively to find the best available value for your business in network and server gear, storage, VoIP and IP Camera hardware, to better help you address your infrastructure needs effectively, efficiently and within budget.
